ZAGREB IN FIGURES 2020

Dear citizens of Zagreb!
Dear guests of our city!

Are you interested in the length of the Sava River that passes through Zagreb? Which day in 2019 was the warmest and which day was the coldest?
Maybe you would like to know the percentage of women living in Zagreb? What is the average age for grooms? What are the most common names of newborn children in Zagreb?
You are also interested in culture and leisure, so you are wondering about the number of animal species that live in the Zagreb Zoo?
Are you a parent? Are you concerned with the number of kindergartens in Zagreb? And which faculty has the most graduate students?

Considering that Zagreb is a tourist city, maybe you are interested in the increase of tourist overnight stays in our city?
You use public transport, so you are interested in how many trams or buses run through the City of Zagreb?
Do you live in Zagreb? Surely you are interested in how the budget funds of the City of Zagreb are distributed and how much is allocated for health care and how much for social protection?

You can find the answers to these and many other questions in an interesting and accessible way in this statistical publication, which is divided into seven sections: Geographical and Climate Data; Population; Culture and entertainment; Education; Economy; Transport and Politics and Public Administration.

This publication will help you get to know Zagreb as a city filled with greenery and a pleasant climate, a vital city in which the number of citizens has grown by more than 21 thousand in the last decade. You will get to know Zagreb as an attractive European metropolis, in which tourists in 2019 realized over 2.6 million overnight stays in hundreds of hotels and hostels and in rich individual accommodation.

With the publication Zagreb in Figures 2020, we want to show you known and less-known information and interesting facts about Zagreb, its history and the present, a city ready for the challenges of the third millennium.
